PROJECTS

✓ AUTOMATED Persistent Storage & CI/CD for Docker Containers – AWS EBS, GitHub & CodePipeline Integration

- **Tech Stack:** Docker, AWS EBS, ECS, ECR, CodePipeline, GitHub Actions, Nginx
- **Persistent Storage:** Integrated AWS EBS with Docker to ensure data survives container restarts
- **Automated CI/CD:** GitHub commits trigger container builds & deployments via **AWS CodePipeline**
- **Seamless ECS Deployment:** Pushed updated Docker images to ECR and deployed via ECS

🚀 **Impact:** Ensures **data durability**, **zero-downtime deployments**, and **automated** cloud-native container management.

✓ Automated Open-Source Full-Stack 3-Tier App Deployment on AWS – DevOps Best Practices! 🚀☁️

Deployed an open-source 3-tier web application on AWS EC2, implementing DevOps automation for a **scalable, secure, and efficient** cloud environment.

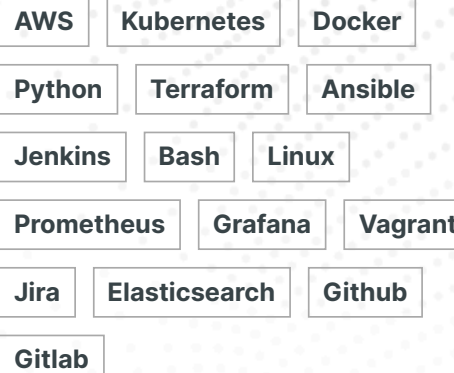

- ♦ Deployment Highlights:
- **AWS EC2 Setup:** Automated provisioning with security best practices.
- **Infrastructure Automation:** Used scripting and DevOps tools for seamless deployment.
- **Cloud Security & Networking:** Configured VPC, IAM roles, security groups, and network ACLs for controlled access.
- **Scalability & Optimization:** Ensured efficient resource utilization and high availability.

✓ AUTOMATED Containerized Website Deployment with Docker & Kubernetes – Scalable & Efficient!

- **Tech Stack:** Docker, Kubernetes, Bash Scripting, Nginx
- **End-to-End Automation:** Deploys a containerized static website using **Kubernetes** with a single command
- **Bash Scripting:** Automates cluster setup, deployment, and scaling—eliminating manual steps
- **Kubernetes Orchestration:** Ensures high availability with multiple replicas and port forwarding for seamless access
- **Portable & Cost-Effective:** Runs locally without cloud costs, deployable anywhere

🚀 **Impact:** Demonstrates **containerization, orchestration, and automation best practices** for scalable, cloud-ready applications.

SKILLS

EDUCATION

Bachelor of Science - BS, Aiops diploma EduQual RQF LEVEL 6 certified (Artificial intelligence operations)

[EduQual UK](#)

EXPERIENCE

DevOps Engineer

AI Nafi

📅 12/2023 - 12/2024

- Automated **cloud deployments** using **CI/CD pipelines** (AWS CodePipeline, GitHub Actions, GitLab CI/CD) and **IaC** (Terraform, CloudFormation).
- Integrated **DevSecOps practices** to enhance compliance and security
- Managed **containerized workloads** with **Docker & Kubernetes**, optimizing scalability and reliability.
- Worked with **AWS services** such as **S3, EBS, ECS, ECR, Lambda, IAM, EKS, SNS, RDS, and EFS** for cloud solutions.
